EDUCATION 6.0
COMPETENCY RANKINGS 2025

Education 6.0 is the convergence of technology, humanity, sustainability, and lifelong learning, positioning India's education system to produce graduates who can lead the next generation of innovation while contributing meaningfully to society and the global economy.

The "Education 6.0 Competency Rankings" represents a groundbreaking approach to assessing educational institutions. Unlike traditional rankings, which focus on conventional metrics like infrastructure and faculty-student ratios, this initiative evaluates how effectively institutions prepare students for the demands of Education 6.0 - an era marked by artificial intelligence, interdisciplinary learning, and personalized education pathways. Our rankings provide a robust framework for students, parents, and stakeholders to identify institutions leading the charge toward an innovative and future-ready education ecosystem.

For Indian higher education institutions, Education 6.0 signifies a transition from merely imparting knowledge to creating future-ready talent capable of thriving in an increasingly dynamic and technology-driven world. Success under this model is measured not only by academic excellence but also by graduate employability, innovation capacity, societal impact, global competitiveness, and the ability to continuously adapt to changing economic and technological landscapes.
